

It has come to my attention that there is an issue that concerns a lot of people that believe in freedom and the American way. Why is it that the nab is allowed to bully a better technology than they can broadcast on, is it money? If so then they need to do what every other business who has a competitor does, self examination and change to compete. Do not allow them to control what we have a choice to listen to. We should have the right to make our own decision. Let them change with time as things should, new technology just makes things better. If we allow ourselves to stay with the old then we stop growing and advancing as we should. Thank you for giving me the opportunity to voice my concern and I trust that you will make the best, fair decision that is right.
